

Port Status Checker :

```
import socket
host = input("Enter hostname or IP address: ")
port = int(input("Enter port number: "))
sock = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
sock.settimeout(2) # Timeout in seconds
result = sock.connect_ex((host, port))
if result == 0:
    print(f"Port {port} on {host} is OPEN.")
else:
    print(f"Port {port} on {host} is CLOSED.")

sock.close()
```

OUTPUT:

```
Enter hostname or IP address: google.com
Enter port number: 80
Port 80 on google.com is OPEN.
```
